Student of MSc. Artificial Intelligence and Robotics at Sapienza.  
Roma

## Riepilogo

- I've a bachelor degree in Computer and System Engineering and currently I am a student of the master's degree course of Artificial Intelligence and Robotics at Sapienza.
- I'm part of the SASA Technology Team at the university. I'm a member of the Navigation Team, that is itself a division of the Software Team. We are a team of engineer students of Sapienza and we are now working on a prototype of the Mars Rover.
- I did the Erasmus in Austria in 2019, in particular at the St. Polten University of Applied Sciences. It was a great experience and I'm willing to repeat it, also in the form of an internship.
- My biggest passion is play rugby. I've been playing rugby since I was 6 years old and now I play for the Arvalia Villa Pamphili Rugby team in "Serie B", the second division. I also worked as a rugby coach for 4 years (2016-2020). Teaching and trying to convey my passion to kids around 10 years old was great and so much fun.

---

## Formazione

Sapienza Università di Roma

Master's degree, Artificial Intelligence and Robotics LM-32 (ENG) · (settembre 2021)

Sapienza Università di Roma

Bachelor's degree, Ingegneria informatica e automatica (ITA) · (settembre 2018 - ottobre 2021)

Fachhochschule St Pölten
